Camilo Castro Venegas

Software engineering (Fullstack)

Hello, I'am Fullstack Developer

In my childhood I was interested Learn the area of the informatic, in which I was able to learn by self-taught methods. After this, I decided to professionalize my interests, entering to study at the AIEP Technical Institute in Programming. and then Computer Engineering mention in Security, where I competed in different events and related fairs to computer science.

After being in various jobs both dependent, As freelancers, I entered my last Development Engineer position at Sellerhub; a spin-off of Conosur Seguros. In it supervised, created and managed teams for the development of an application multi-platform based mainly on Laravel + JS + Amazon web service.

I consider myself an optimistic, sensible person when making decisions, able to work in a team and responsible; over my other abilities.

I hope to be part of a new challenge, where I can develop my skills and knowledge, meeting the company's expectations.
